OFFERED BY

WILLIAM BULL, F.L.S.,

NEW PLANT AND SEED MERCHANT,

536, King's Road, CHELSEA, LONDON, S.W.

N.B.—In ordering Flower Seeds from this Catalogue, it will be sufficient to quote the marginal number affixed to each article.

1. COMET ASTER, White.

This is undoubtedly one of the finest Novelties of the year, and forms a most desirable addition to this popular section. The flower, which resembles very closely a pure white large-flowered Japanese Chrysanthemum, is very large and double, the petals being much longer than in the ordinary Comet Aster, and more twisted; each petal is ribbed, giving the flower a very elegant appearance. The flower is of the purest possible glossy satiny-white, and cannot fail to take the leading place as an exhibition variety. 1*s.* 6*d.* per packet.

2. AGERATUM, TOM THUMB, WHITE GEM.

CELOSIA JAPONICA AUREA.

This charming new Ageratum is of very dwarf and compact habit, attaining only a height of 4 inches, the plants being completely covered with large heads of beautiful white flowers. It will be found a most valuable acquisition for ribbon borders. Price 1*s.* per packet.

3. CELOSIA JAPONICA AUREA.

THE GOLDEN-YELLOW
JAPANESE BRANCHED COCKSCOMB.

In habit this is the same as the favourite crimson variety, forming a pyramidal branched plant about 2 feet high, each branch being surmounted with a finely ruffled comb of bright golden yellow. 1*s.* per packet.

CENTAUREA CYANUS, VICTORIA.

4. CENTAUREA CYANUS, VICTORIA.

A beautiful new dwarf variety of the well-known and popular Blue Cornflower, growing only about 8 inches in height. The flowers are borne in the utmost profusion and are of the most brilliant blue colour. The compact habit of this pretty annual will render it of the greatest use for planting in beds and borders. Price 1s. per packet.

5. CALIFORNIA "YELLOW BELLS."

(EMMANTHE PENDULIFERA.)

A very meritorious novelty from California. It is an annual, forming bushy plants 9 to 12 inches high, with pinnatifid foliage, each branch being loaded with broadly bell-shaped pendulous flowers about half-an-inch long, of a creamy-yellow colour. The general effect of a branch is very suggestive of a long spike of *Lily of the Valley*, with large yellow bells. 1*s.* per packet.

GAILLARDIA, LORENZ'S PERFECTION.

6. GAILLARDIA, LORENZ'S PERFECTION.

By careful cultivation and selection, extending over many years, the present strain has now been produced and fixed from the well-known *G. picta Lorenziana*. In this variety the quilled petals are produced in such great abundance as to give the flowers the appearance of a round ball. It will be found a grand cut flower for bouquets. 1*s.* per packet.

7. THE TULIP POPPY.

(PAPAVER GLAUCUM.)

A very showy and brilliant novelty, introduced from Armenia. The plant attains a height of 12 to 14 inches, producing well above the foliage from 50 to 60 large and splendid flowers of the most vivid scarlet imaginable. As will be seen from the illustration, the flowers are somewhat peculiar in shape, the two inner petals remaining erect in the centre of the flower, thus forming a cup-like receptacle containing the anthers and capsule.

From a mere description no adequate idea can be obtained of the very striking and beautiful effect produced by a mass or bed of these plants when in full bloom, the glowing richness of colour and peculiar shape of flower at once suggesting one of the vermilion-coloured Tulips, hence the fitness of the popular name "Tulip Poppy."

If sown in the open border, the small seeds lie several weeks before germinating; in a hot-bed it comes up in little more than a week. 1*s.* 6*d.* per packet.

THE TULIP POPPY (PAPAVER GLAUCUM).

8. CARDINAL POPPY.

The dwarf and particularly robust habit of growth of this novelty renders it quite distinct from all other double Poppies. The plant attains a height of about 18 inches and is furnished with deeply cut dark green foliage, against which the enormous and very double flowers of glowing scarlet, on a white ground, stand out in striking contrast. The Cardinal Poppy, being so extremely showy, will be found extremely effective for massing either in beds or borders. 1*s.* per packet.

9. DOUBLE FRINGED PETUNIA, "SUNSET."

DOUBLE FRINGED PETUNIA, "SUNSET."

A very distinct new colour amongst the double-flowered Fringed Petunias. The plants grow of medium height, producing in the greatest profusion elegantly fringed brilliant carmine-rose flowers of exquisite beauty.

1*s.* 6*d.* per packet.

10. TAGETES PATULA NANA GRANDIFLORA FLORE-PLENO.

TAGETES PATULA NANA GRANDIFLORA FL. PL.

A new large flowering variety of the old double dwarf French Marigold, of robust growth, and producing large perfectly double flowers from 2 to 3 inches across. The blossoms, which are of a rich crimson-brown colour, edged with golden-yellow, are borne in uninterrupted succession on strong stems, well displayed above the foliage. It will be found particularly adapted for planting in groups, and will also prove very effective for planting singly in beds or borders.

Price, 1*s.* per packet.

11. VERBENA COMPACTA COCCINEA OCULATA.

VERBENA COMPACTA COCCINEA OCULATA.

A beautiful new variety especially useful for bedding, its compact growth rendering the usual training and pegging quite unnecessary. The flowers, which are borne in large trusses in the greatest profusion, are bright scarlet with a large white eye.

1*s.* per packet.

12. ZINNIA, DOUBLE STRIPED PERFECTION, "SCARLET AND GOLD."

ZINNIA, DOUBLE STRIPED PERFECTON, "SCARLET & GOLD."

A grand and most distinct improvement on existing kinds. The very large and faultlessly shaped flowers are of a pure golden yellow, elegantly striped with bright scarlet. The effect produced by the mixture of these two colours is most striking, making it one of the most desirable novelties of the season. About 70 per cent. come true from seed.

1*s.* 6*d.* per packet.

SPECIALITIES FOR 1892,

OFFERED BY

WILLIAM BULL, F.L.S.

13. JEWEL ASTER, APPLE BLOSSOM.

A new and magnificent Aster, obtained from the well-known large-flowered "Pæony Perfection" Aster. Somewhat dwarfer in habit than the latter, it is distinguished at first sight by its beautiful shorter petalled and perfectly round flowers, which may be compared to the finest varieties of the Incurved class of Chrysanthemums (*vide* Illustration). The blossoms measure from 2½ to 3 inches in diameter, and being borne on long stalks will prove especially useful for cutting.

1*s*. per packet.

14. NEW DOUBLE MARGARET CARNATIONS.

A beautiful novelty, growing about 12 inches high, and producing in the utmost profusion charming flowers of every variety of colour, including yellow. The plants are of vigorous growth, the numerous flower stalks being exceedingly strong and robust, and do not therefore require to be supported by sticks. For pot culture this variety cannot be excelled, and is, besides, most valuable for growing in beds and borders, and for cut-flower purposes generally.

1*s*. per packet.

15. CHRYSANTHEMUM CARINATUM FL. PL.

NEW DOUBLE HYBRIDS.

This valuable and most unique novelty has resulted from carefully hybridizing and selecting for several years the semi-double varieties of this useful annual already existing, until a high degree of doubleness has been attained. They are extremely variable. Some are pure white, yellow, or crimson, but the prevailing types are bronzy yellow, the florets tinged with red or lilac-rose, the imbricated ray florets beautifully pencilled, others have rich crimson centres with clear yellow guard petals. Although mostly very double, there will still be an occasional semi-double or even single, but these are almost equally charming. The Horticultural Press have given most favourable comments respecting this novelty—see all the leading Gardening Papers of August 9th, 1890. Amongst others, the *Journal of Horticulture* gave a full page engraving and complete description of them, whilst the *Gardeners' Chronicle*, *The Garden*, and *The Gardening World*—the latter of August 16th—gave most favourable reviews. The seed is now offered in finest mixture. 1*s*. per packet.

16. NEW DOUBLE-FLOWERED CORNFLOWER.

(CENTAUREA CYANUS FL. PL.)

Several years of careful selection have resulted in producing and fixing double-flowering forms of this most useful and ornamental Annual. The flowers in form may be compared to those of "*Gaillardia Lorenziana*," and form masses of bloom of great beauty. For garden decoration and cutting these pretty double Cornflowers will be found very useful. From 60 to 70 per cent. of doubles will be obtained from the seed offered, and they will comprise not only the well-known colours of the single sorts, such as white, light blue, rose, brick-red, purple, &c., but in addition many perfectly new and beautiful shades and stripes.

Per packet, 6*d*.

17. GODETIA, WHITE PEARL.

A new pure white dwarf variety, reproducing itself true from seed. Its individual flowers are not quite so large as those of the variety *Duchess of Albany*, but equally as pretty, and of the same satiny white. On account of its very regular and compact growth, it is admirably adapted for planting in beds and ribbon borders.

Price, 1*s*. per packet.

LOBELIA CARDINALIS.

18. LOBELIA CARDINALIS.

(THE CARDINAL FLOWER.)

A splendid herbaceous perennial, bearing long spikes of cardinal-scarlet flowers, forming a most attractive object either in beds or borders. Very useful for cutting for all kinds of decoration.

Price, 1*s.* per packet.

LOBELIA FORMOSA.

19. LOBELIA FORMOSA.

A very distinct and beautiful new Lobelia, producing a profusion of deep ruby - scarlet flowers. The blossoms are large, as deep and bright in their way as the well known blue *Lobelia speciosa*, with which it compares also in habit of growth. It is the most vivid scarlet dwarf bedding Lobelia yet seen.

1*s.* per packet.

20. ## PHLOX DRUMMONDII SEMI-PLENO.

MIXED COLOURS.

This mixture of semi-double Phlox contains, beside the white, scarlet and deep purple varieties, the following tints:—pale yellow, pink, rose-marbled, and violet-purple.

1*s.* per packet.

21. ## PRIMROSE, HARDY HYBRIDS.

These beautiful hardy hybrid Primroses produce a profusion of large flowers of many bright and brilliant colours. In a mild season they will often commence blooming in the autumn, and continue through the winter.

1*s.* per packet.

22. ## NEW PANSY, PEACOCK.

This charming variety is exceedingly attractive, its beautiful combination of colours amply justifying its name. On each of the upper petals is a large blotch of peacock blue on a maroon ground surrounded with crimson, and margined with a narrow edging of white. The remaining petals are crimson heavily shaded with rich maroon, the lower one being ornamented with a spot of peacock blue, all edged with white, in the same manner as the upper petals.

1*s.* & 1*s.* 6*d.* per packet.

PRIMULA OBCONICA.

23. ## PRIMULA OBCONICA.

A pretty and interesting Primula, with flowers of a soft lilac shade of colour. It is a native of China, and in habit and foliage resembles the beautiful *P. cortusoides*, but differs in flowering continuously and profusely from spring till autumn, rendering it one of the most useful of Primulas for pot culture; it also succeeds admirably during the summer months in the open border. 1*s.* per packet.

24. HELICHRYSUM SILVER BALL.

A magnificent new variety of this old and favourite Everlasting. The plant grows about 2½ feet high, with luxuriant bright green foliage, and produces, in the most profuse manner, large regularly formed double flowers of a beautiful silvery white.

1*s.* per packet.

25. DOUBLE PÆONY-FLOWERED POPPY.

(PAPAVER "CHAMOIS ROSE.")

This very showy Annual Poppy is of a brilliant Chamois-rose, bearing large stately double globular flowers, thrown well above the foliage. Very effective for large beds, shrubberies and borders.

6*d.* per packet.

26. POPPY WHITE SWAN.

This charming novelty is one of the best introductions of the year, growing into a dense branching bush from 1½ to 2 feet high, above which are produced, on strong slender stems, its large pure white double flowers, the petals being beautifully laciniated. From the snowy whiteness of the blossoms, they are admirably adapted for cutting, and plants when in full flower will be found very effective either planted singly or in groups.

1*s.* per packet.

27. POPPY, THE SHIRLEY.

A very beautiful selection of the Ranunculus-flowered Poppy, the range of colours extending from pure white through the most delicate shades of pale pink, rose and carmine, to the deepest crimson, whilst, to add to the effect, many are most delicately edged, shaded and striped. The form is most beautiful, being generally single or semi-double, rendering it a very valuable flower for table and general decoration, as the blooms—although, like all Poppies, somewhat transient—when cut young will stand for several days without dropping or fading.

6*d.* per packet.

28.

POPPY, THE BRIDE.

There is no class of flowers more popular than the various types of Poppy. The present novelty is a pure white single selection from the ordinary *Papaver somniferum*, the flowers of large size, and the petals nearly entire at the margin. It will be a great acquisition for cutting purposes, the flowers requiring to be cut as soon as barely expanded, and put in water for a few hours before being taken to market; they will then stand a considerable time.

6*d*. per packet.

ICELAND POPPIES.

These Poppies range in colour from the purest satiny white and yellow to the deepest glowing orange-scarlet, and have a delicious lilac-like fragrance, the flowers being produced in never ceasing succession from the beginning of June to October. Not only are these Poppies attractive in the garden, but for elegance in a cut state they are simply unsurpassed, lasting quite a week if cut directly they are open. They are offered in the following varieties:—

29. **PAPAVER NUDICAULE**, clear yellow. 6*d*. per packet.
30. **PAPAVER NUDICAULE ALBUM**, pure white. 1*s*. per packet.
31. **PAPAVER NUDICAULE MINIATUM**, brilliant orange-scarlet. 1*s*. per packet.

32.

NEW SUNFLOWER,

LARGE PRIMROSE COLOURED.

A variety of *Helianthus annuus*, with primrose-coloured flowers, which cannot but prove a very striking and desirable acquisition.

6*d.* per packet.

33.

TORENIA, WHITE WINGS.

TORENIA, WHITE WINGS.

This lovely annual is a sport from the well-known Torenia Fournieri, and possesses the same compact habit of growth and floriferousness as that variety. The colour is unusually attractive, being pure white, with a slight flush of rose at the throat, and is a decided break from the colours hitherto known in this genus.

The Torenias make one of our best vase and basket plants, on account of their thrifty habit and profusion of bloom, and are well adapted for edgings and borders in the open ground, growing and flowering luxuriantly in the warmest and sunniest situations, from June until cut down by the frost.

1*s.* per packet.

34.

MAMMOTH VERBENAS.

MAMMOTH VERBENAS.

A greatly improved strain of Verbenas, the plants being of sturdy vigorous habit and yielding a profusion of immense trusses of flowers, of all the colours known in this useful section of bedding plants, each flower being larger than a shilling piece. This great improvement in size is certain to increase in a very large measure the popularity of these charming flowers, this strain being altogether distinct and surprisingly beautiful. The colours present the same wide range as the ordinary type.

POPPY.—*Vide* pages 3, 10, 11, 34 and 39.

256. **PORTULACA GRANDIFLORA FL. PL., extra choice mixed colours.**—A very desirable double-flowered species, of dwarf compact habit, producing large brilliantly coloured flowers. 6*d.* per packet.

PORTULACA, Assortments.—*Vide* page 34.

257. **PRIMROSE, YELLOW (Common Primrose).**—One of the earliest harbingers of spring. 6*d.* per packet.

258. **PRIMULA CASHMERIANA,** foliage large, smothered with golden farina, flowers rich violet-purple with yellow centre, borne in close globular umbels; one of the best. 1*s.* per packet.

259. **PRIMULA FLORIBUNDA.**—A pretty greenhouse species, producing continuously an abundance of yellow flowers, which are borne in superposed whorls, on erect stems. It has been awarded a First-Class Certificate. 1*s.* per packet.

260. **PRIMULA JAPONICA.**—A Primula a foot and a half high, bearing 4 or 5 separate whorls of flowers, each flower nearly an inch in diameter, and of a splendid magenta colour, and the plant, moreover, perfectly hardy. 6*d.* per packet.

PRIMULA OBCONICA.—*Vide* page 9.

261. **PRIMULA ROSEA.**—A very desirable hardy species from the Himalayas. Of free growth and vigorous habit, it succeeds in almost any situation, producing in the most profuse manner its heads of brilliant rosy pink flowers. 1*s.* per packet.

PRIMULA SINENSIS FIMBRIATA.—Of sorts, *vide* pages 14 and 15.

262. **PRIMULA SIKKIMENSIS.**—One of the best of the hardy Primulas, bearing clusters of long pendent flowers of a pale yellow, beautifully scented. A most useful plant for borders or for garden. 1*s.* per packet.

263. **PYRETHRUM, from fine double varieties.**—The value of these highly decorative plants can scarcely be over-estimated. 1*s.* per packet.

264. **PYRETHRUM AUREUM (Golden Feather).**—Its elegant feather-like golden leaves make it an effective plant for bedding or ribbon decoration. 6*d.* per packet.

265. **PYRETHRUM AUREUM SELAGINOIDES.**—A distinct form of *Pyrethrum aureum*, of dwarf and compact habit, the flat foliage resembling fronds overlaying each other, which gives the plants a fine level appearance. 1*s.* per packet.

RESEDA ODORATA.—*Vide* Mignonette, pages 23 and 39.

266. **RICINUS GAMBOGENSIS.**—A very vigorous variety, the stems and leafstalks being ebony black; leaves richly coloured. 6*d.* per packet.

SALPIGLOSSIS, Assortments.—*Vide* page 34.

267. **SALVIA PATENS.**—Lovely deep blue flowers. 1*s.* per packet.

268. **SALVIA, INGENIEUR CLAVENAD.**—A variety raised from *S. splendens*, similar in character, but more floriferous, and much darker in colour. 1*s.* per packet.

SCABIOUS, Assortments.—*Vide* page 34.

269. **SCHIZANTHUS PINNATUS ROSEUS.**—A really beautiful annual of a delicate rose, shading off at the centre to white, the upper petal being almost entirely covered with a blood-red spot. 6*d.* per packet.

270. **SILENE PENDULA COMPACTA.**—A compact-growing form of the well-known *Silene pendula;* flowers of the same size and colour as the type. 3*d.* per packet.

271. **SILENE PENDULA COMPACTA ALBA.**—In habit same as above; flowers white. 3*d.* per pkt.

272. **SILENE PENDULA COMPACTA ROSEA FLORE PLENO.**—This double-flowering variety is of very compact growth, and its flowers, which are produced in the greatest profusion, are very double and of very long duration, rendering it far more valuable for bedding purposes than any of the old single varieties. 6*d.* per packet.

STOCK, DOUBLE GERMAN (Finest Imported).—In collections.—*Vide* pages 31 and 32.

273. **STOCK, EAST LOTHIAN, CRIMSON.**—The flowers of this intermediate variety are of the most beautiful crimson colour. 1*s.* per packet.

274. **STOCK, EAST LOTHIAN, PURPLE.**—1*s.* per packet.

275. **STOCK, EAST LOTHIAN, SCARLET.**—1*s.* per packet.

276. **STOCK, EAST LOTHIAN, WHITE.**—1*s.* per packet.

The above four beautiful varieties are remarkable for brilliancy of colour in the three former and purity in the latter. The flowers are very double, and produced on immense spikes.

277. **STOCK, PERPETUAL TEN-WEEK, PRINCESS ALICE.**—This is especially valuable for cut flowers, producing its snow-white blooms in uninterrupted succession from May until November. It is particularly suited for border cultivation, and is equally recommended for pot culture. *Vide illustration.* 1*s.* per pkt.

278. **STOCK, PURPLE BROMPTON.**—From an unrivalled strain. 6*d.* per packet.

279. **STOCK, SCARLET BROMPTON.**—A magnificent strain. 6*d.* per packet.

280. **SUNFLOWER, NEW MINIATURE.**—Height about 2½ feet. The most suitable of all Sunflowers for cut bloom, producing an abundance of bright golden yellow flowers. 6*d.* per packet.

SWEET PEAS, NEW.—*Vide* page 17.

NEW SNOW-WHITE PERPETUAL TEN-WEEK STOCK, PRINCESS ALICE.

281. **TACSONIA IGNEA.**—Beautiful scarlet, splendid variety. 1*s.* per packet.

282. **TACSONIA INSIGNIS.**—A robust-habited and free-blooming evergreen climber, producing on long pendent stalks large flowers of a luminous crimson colour, which change after gathering to a violet-rose. 1*s.* 6*d.* per packet.

283. **TACSONIA VAN VOLXEMI.**—This beautiful climber flowers most abundantly, and for almost the whole year; the large flowers are of the richest scarlet. 1*s.* per packet.

284. **TORENIA BAILLONII.**—A very pretty and distinct species, bearing bright yellow flowers, with a purplish-brown tube. 1*s.* per packet.

285. **TORENIA FOURNIERI.**—A most charming half-hardy annual, bearing large sky-blue flowers with three spots of a dark indigo-blue and a bright yellow stain in the centre. 1*s.* per packet.

286. **VERBENA HYBRIDA COMPACTA CANDIDISSIMA.**—Dwarf and compact, comes nearly true from seed, the branches measuring scarcely half the length of the old variety, being of short vigorous habit, and forming a compact bush, about 5 inches in height, literally covered with umbels of beautiful white flowers. 1*s.* per packet.

VERBENA HYBRIDA COMPACTA CANDIDISSIMA.

287. **VERBENA, finest mixed.**—Saved from a splendid collection of the best named varieties. Great care has been taken that this seed should be saved from such as are really good bedding kinds, and of attractive colours. 1*s.* per packet.

288. **VERBENA HYBRIDA AURICULÆFLORA,** choice mixed.—This superb and distinct section produces beautiful flowers with large pure white eyes. 1*s.* per packet.

289. **VERBENA CARNATION STRIPED.**—This section may be expected to produce flowers variously striped, blotched, and spotted. 1*s.* per packet.

VERBENA, MAMMOTH.—*Vide* page 12.

290. **VIOLA CORNUTA ALBA.**—Small pure white flowers; profuse bloomer. 6*d.* per packet.

291. **VIOLA CORNUTA, MAUVE.**—A fine variety for bedding. 6*d.* per packet.

292. **VIOLA LUTEA GRANDIFLORA.**—One of the most useful of all the yellow-flowering group of bedding Violas. 6*d.* per packet.

293. **VIOLA ODORATA** (Sweet Violet), purple.—6*d.* per packet.

294. **VIOLA ODORATA, THE CZAR.**—A fine free-flowering variety, of robust habit, flowers very large; one of the best in cultivation. 6*d.* per packet.

295. **WALLFLOWER, Dark Blood Red.**—Fine dark colour. Per packet 6*d.*

296. **WALLFLOWER, HARBINGER, an Autumn and Winter Flowering Variety.**—It continues in bloom during the Winter months (unless very cold), and thereby ensures cut blooms of this favourite flower when no other out-door and but few greenhouse flowers can be had. The blossoms are of a rich dark red colour. 6*d.* per packet.

297. **WALLFLOWER, BELVOIR CASTLE, dwarf yellow.**—Dwarf compact habit; the bright yellow blossoms being large and well-shaped. 6*d.* per packet.

WALLFLOWER, DOUBLE GERMAN.—In collections.—*Vide* page 34.

298. **WALLFLOWER, PRIMROSE DAME.**—This new Wallflower is of the sturdy compact habit of growth of the Golden Tom Thumb, but is entirely different in colour of flower from any sort yet known, being of a beautiful clear primrose-yellow, a colour which contrasts well with the dark green foliage, and will render it a valuable plant for spring beds, also for cutting purposes. 1*s.* per packet.

299. **ZINNIA ELEGANS ALBA FL. PL.**—A beautiful variety, producing magnificent double white flowers all through the season. 1*s.* per packet.

ZINNIA ELEGANS Assortments.—*Vide* page 34.

300. **ZINNIA HAAGEANA FL. PL.**—Brilliant orange flowers; full, double, and as regularly built as those of *Z. elegans fl. pl.* 1*s.* per packet.

301. **ZINNIA ELEGANS ROBUSTA GRANDIFLORA PLENISSIMA.**—A great improvement on the old sorts of this favourite flower. It is a most robust grower, forming a handsome bush 3 feet or more in height, completely covered by its enormous flowers, measuring from 5 to 5½ inches across. The colours are also more beautiful and intense, some being perfectly dazzling. 6*d.* per packet.

302. **ZINNIA ELEGANS, DOUBLE TOM THUMB (NEW).**—Charming little plants, growing about 6 inches high, invaluable for beds or borders. 1*s.* per packet.

COLLECTIONS & ASSORTMENTS OF EXTRA CHOICE FLOWER SEEDS.

Mr. W. B. begs to remark, that in making his selection of Asters and Stocks he has in every instance obtained from the best sources, and carefully selected only the most distinct colours, discarding all that are dull and ineffective, so frequently found in collections made up on the Continent.

Sow Aster seed in April and May, in pans, or on a spent hot-bed in drills 6 inches asunder; when the plants are 1 inch high, prick out into a cold frame, or under hand-glasses, 3 or 4 inches apart, from whence they can be planted out when 4 inches high. Select showery weather for planting out, when the ground is in good working order; plant in rows 1 foot apart each way. To grow Asters to perfection, a rich soil is indispensable, and during dry weather they should be watered, and a top-dressing of well-rotted manure applied early in August.

STOCKS.

EAST LOTHIAN STOCK.

These Stocks are, without exception, the finest ever offered, the colours being crimson, scarlet, purple, and white, of remarkable brilliancy in the three former, and purity in the latter. The flowers are very double, produced on immense spikes.

* Hardy annuals most suitable for autumn sowing.

TIME OF SOWING.

HARDY ANNUALS may be sown in March and April, and for early spring blooming those marked with an asterisk should be sown early in September, in a sheltered situation, and when up, thinned so as to keep them strong. In March they may be transplanted where they are to bloom. Before sowing, which should be done on a fine dry day, carefully prepare the soil, and in covering, regulate the thickness by the size of the seeds—small seeds should be very lightly covered. Success in growing annuals depends in a great measure upon their being properly thinned to regular distances, so as to give plenty of room for the full development of each plant; this, in too many instances, is entirely neglected, hence the dissatisfaction so often expressed as to their use.

HALF-HARDY ANNUALS may be sown in March and April, in pans, placed on a slight hot-bed, and, when strong enough, pricked out into a cool frame near the glass, where they may get hardened and well established for transplanting into their blooming quarters early in May, or potted off singly for conservatory and greenhouse decorations. Under favourable circumstances many varieties will bloom freely if sown in the open ground about the middle of May.

TENDER ANNUALS such as Balsams, Celosias, Thunbergias, &c., require raising in a temperature ranging from 60° to 70°. Sow in pans or pots, and place near the glass; keep the soil moist, and shade from the sun until the plants appear. When strong enough, pot off into small pots, keeping them near the glass, and admitting air on every favourable occasion.

BIENNIALS AND PERENNIALS.—The more select and tender varieties for summer and autumn blooming may be sown in a gentle heat in March and April, and pricked out into pots until fully established, and then potted off singly, or transplanted into the open ground, as required. The hardier varieties may be sown in the open ground, in prepared beds, in June and July, and when strong enough transplanted into nursery beds, or where they are intended to bloom the following year.

CHOICE COLLECTIONS OF FLOWER SEEDS.

As in Flower Seeds new species or varieties and improved strains are being constantly imported, proved, or raised, and offered by Mr. William Bull, it naturally follows that giving mere names and descriptions convey in many instances but an inadequate idea of the desirability of some of the handsomest and best introductions. Collections of Flower Seeds are therefore made comprising the choicest strains of popular favourite flowers, and including selections of the best novelties.

Quality rather than quantity being especially considered—Mr. W. B.'s selections may safely be relied on in these Collections.

CHOICE COLLECTIONS OF VEGETABLE SEEDS

FOR ONE YEAR'S SUPPLY.

The following Collections of Vegetable Seeds have been arranged to meet the requirements of those who have not time or inclination to make their own selections. They are made up in the most liberal manner, care having been taken to give all the best and most useful varieties in each section, rather than a long list of comparatively useless kinds—

SPECIALITIES IN VEGETABLE SEEDS FOR 1892,

OFFERED BY

WILLIAM BULL, F.L.S.

CULINARY PEA.

EXCELLENT.

A fine wrinkled variety, growing from 5 to 6 feet high, abundantly producing large scimitar-shaped pods, well filled with 8 to 10 extra large Peas of fine flavour and good colour; an exceptionally productive and handsome kind.

In pint packets, 2*s.* each.

VULCAN (**Eckford**).—A fine dwarf late Pea, of a bright green colour and delicious flavour. Height about 18 inches.

In pint packets, 1*s.* 6*d.* each.

NEW TOMATO—LONG KEEPER.

This new Tomato is the result of continued selection for many years, and it is now offered as a variety that will keep longer than any other sort that can be procured. The fruit is of a beautiful bright red colour, the shape being perfect and the flavour most excellent. It is one of the first to ripen and of great productiveness.

Price, 9*d.* per packet.

SELECT GENERAL LIST OF VEGETABLE SEEDS.

In the following General List of Vegetable Seeds, MR. WILLIAM BULL has excluded all varieties of doubtful origin and quality, only the most distinct and useful varieties in each section being quoted. The Stocks of all seeds have been carefully selected from the most eminent cultivators at home and on the Continent, and their growth having been effectually tested, they are confidently offered as being the very best that can be procured.

ARTICHOKES.

Sow early in March, in rich soil, and when strong enough plant in rows 4 feet apart, and 30 inches from plant to plant.

This vegetable requires the same treatment as Salsafy, only sow in drills 18 inches apart, and thin out to 9 inches from plant to plant.

SEA KALE	per oz.	0 4

Sow moderately thick early in April, on deeply trenched and richly manured ground, in drills 18 inches apart, and thin out to about 2 feet asunder.

SPINACH.

The round variety should be sown at intervals from March to June, to ensure a constant supply during the summer. The prickly or triangular-leaved sort is usually sown about the end of July or beginning of August for winter use, in drills 1 foot apart. New Zealand Spinach *is a useful and excellent vegetable, and should be raised in a gentle heat in March, and transplanted in May or June 3 feet apart each way, into rich light soil.*

BULL'S FOOD FOR PLANTS.

Contains in a concentrated form all the essential elements of plant life. It is of immense benefit applied as a top-dressing to plants and bulbs of all sorts grown in pots, especially when pot-bound, completely restoring exhausted energy, a few applications ensuring vigorous healthy growth, the flowers being produced in a most luxurious manner, combined with great richness of colouring. It can also be mixed with ordinary soil in potting, or may be used with most beneficial effect for Chrysanthemums, Shrubs, Vines, and all kinds of Fruits, whether in pots, or planted in the open air.

DIRECTIONS FOR USE.

For POT PLANTS AND BULBS.—Sprinkle on the surface of the soil, about every three weeks, at the rate of a large teaspoonful to a 5-inch pot, so that when the plants are watered, the Plant Food will be gradually absorbed into the soil.

For ROSES, SHRUBS, VINES, &c., in Pots.—Use about a tablespoonful to a 12-inch pot several times during the season.

For PLANTS, FRUITS, ROSES, and all Plants in Borders and the Open Ground.—Apply about 2 ozs. to the square yard as often as occasion may require, raking and watering it in.

For LAWNS.—Scatter broadcast at the rate of 2 ozs. to the square yard, and well water.

Sold in Boxes, containing about 1½ lbs., price, 1s. each. Larger Size, containing about 5 lbs., price, 2s. 6d. each.
Also in Bags, 14 lbs., 4s. 6d.; 28 lbs., 7s. 6d.; 56 lbs., 12s. 6d.; 112 lbs., 20s.

TESTIMONIALS

DYNEVOR CASTLE, *9th April*, 1891.

Dear Sir,—I beg to say I am highly pleased and gratified with the results from your "Plant Food." I find it gives almost immediate benefit, and at the same time is more lasting in effect than other artificial manures I have been in the habit of using; further, being void of smell it can be applied to plants wherever situated, whether in the house or conservatory, without fear of detection. I am, dear Sir, yours faithfully, THOS. COWBURN,
Gardener to the Rt. Hon. Lord DYNEVOR.

GOLDEN GROVE, CARMARTHEN, *July 14th*, 1891.

Sir,—Please send, on account of Viscount Emlyn, a supply of Plant Manure, same as last sent me. I am glad to say it is the best artificial manure I have ever used. Yours respectfully, JOHN HILL,
Gardener to the Rt. Hon. Viscount EMLYN.

THE QUINTA, BROMBURY, HEREFORD, *April 16th*, 1891.

Dear Sir,—Having given your Food for Plants a trial, I have great pleasure to inform you that its effect on all kinds of plants is most beneficial, either as a surface dressing or mixed with the soil at time of potting; and for all kinds of fruit trees it is invaluable. I cannot speak too highly of its virtue, differing as it does from all other artificial manures in being quite free from any unpleasant odour. No gardener should be without it.
Yours faithfully, A. EMPSON,
Gardener to P. B. GILES, Esq.

THE GROVE, TEIGNMOUTH.

Dear Sir,—Amongst the many artificial manures I have tried, your Plant Food in my estimation takes first rank. I have tried it on various plants to my entire satisfaction, and its effect on Chrysanthemums is simply marvellous, apart from which, it is easy to apply and has no unpleasant smell. I shall certainly recommend it strongly to my friends. I am, dear Sir, yours truly, JOHN STILES.

STRATTON PARK, MICHELDEVER, *19th December*, 1891.

Dear Sir,—I am much pleased with your Plant Food; I have tried it on a great variety of plants with the most gratifying results.
R. GANDY,
Gardener to the Rt. Hon. Earl of NORTHBROOK.

MALSHANGER, BASINGSTOKE.

Dear Sir,—I have tried your Plant Food on Vines, Cucumbers, Melons, Tomatoes, &c., and the effect was quite phenomenal; it pleases me much. I am, yours truly, N. KNELLER.
Gardener to W. S. PORTAL, Esq.

CHOICE GLADIOLUS.

(HYBRIDS OF GANDAVENSIS.)

There are few flowers more showy and beautiful than the Gladiolus, and the varieties of the *Gandavensis* section are perfectly hardy and easily grown, whilst their erect and stately growth, and long spikes of flowers, developing themselves successively, never fail to win admirers.

To facilitate the cultivation of this highly decorative plant, a few remarks may be necessary to some:—

The best and safest time for planting is from the beginning of April to the end of May, when a continuous bloom may be assured from July to September.

Soil is not much a point for consideration, so long as it is not stiff and consolidated; but it is important that it should be deeply dug previous to planting.

Large bulbs should be planted from 3 to 4 inches, and smaller bulbs 2 inches deep.

This beautiful tribe of plants should be largely planted everywhere, because—

They are perfectly hardy and easily grown.

They are gorgeously beautiful.

Their handsome spikes of flowers are useful for decorating vases and epergnes.

Their flower buds expand and last a long time when cut and placed in water.

They are charming when introduced into borders among Evergreens.

Planted by hundreds among Rhododendrons, they brighten and enliven the beds during the summer and autumn months.

Orders are booked throughout the year at the following prices, and the bulbs supplied in January, February or March.

DOUBLE TUBEROSES.

(POLIANTHES TUBEROSA.)

The perfectly double flowers of *Polianthes* are well known for their delicious fragrance and pearly whiteness, being admirably adapted for Button-holes, Bouquets, &c.; indeed, are of the greatest value wherever cut flowers are required. By successional plantings these lovely flowers may be had all through the summer and autumn. They should be potted in rich loamy soil and started in a good bottom heat, being afterwards grown on in a stove, with plenty of moisture.

BEGONIAS.

HANDSOME FLOWERED TUBEROUS-ROOTED SECTION.

The immense size to which the flowers of this popular race of plants have now attained considerably enhances their value for decorative and bedding purposes. Of nearly every shade of colour, from deepest crimson-scarlet to white, the blooms are produced in the utmost profusion, thus rendering them extremely showy and attractive.

Selections of good single-flowering named varieties can be made by Mr. W. B. at 12s., 18s., and 30s. per dozen.

For Seed, *vide* pages 18 & 19.

Named Varieties with double flowers, at 30s., 42s., and 60s. per dozen.

MIXED SEEDLINGS—UNNAMED.

Raised from the best varieties of every shade of colour.
Single flowered kinds, 6s. and 9s. per dozen; 2 and 3 guineas per 100.
Double flowering sorts, unnamed, 12s. and 18s. per dozen.

SPIRÆA ASTILBOIDES.

SPIRÆAS.

SPIRÆA ASTILBOIDES.—One of the most handsome of hardy herbaceous perennials, which cannot be too highly appreciated as a decorative plant for early forcing. Certificated both by the Royal Horticultural and Royal Botanic Societies. The inflorescence consists of compound feathery branches of elegant white flowers. It is a charming and indispensable plant for pot culture, its beautiful flowers being produced in the greatest profusion. 1*s.* 6*d.* and 2*s.* 6*d.* each. 15*s.* and 24*s.* per doz.

SPIRÆA ASTILBOIDES FLORIBUNDA.—A new variety, differing from the type in producing beautiful thyrsoid spikes of bloom, much more crowded with flowers than is the case with *S. astilboides*. It is also described by the raiser as of more robust and hardier growth, the foliage being of a rich deep green colour. 5*s.* each. 48*s.* per doz.

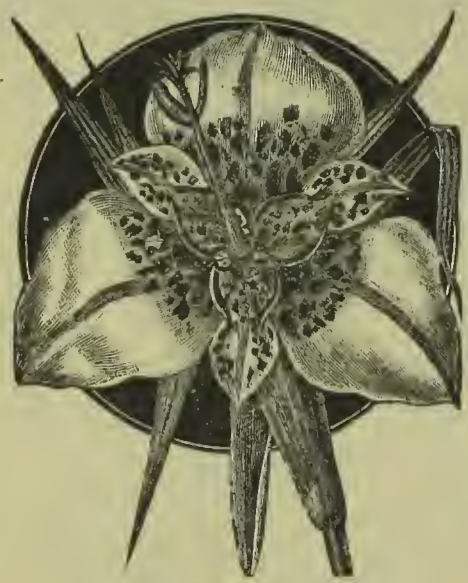
SPIRÆA (HOTEIA) JAPONICA.—Most useful for decorative purposes. *Strong clumps.* 5*s.* per dozen.

SPIRÆA JAPONICA AUREO-RETICULATA, pretty variegated foliage, added to which it bears a profusion of handsome compact spikes of pure white flowers. 9*s.* and 12*s.* per doz.

SPIRÆA JAPONICA COMPACTA MULTIFLORA.—This most desirable variety is a great improvement on the old *S. Japonica*, as it produces a profusion of large and dense spikes of pure white flowers, in telling contrast to the dark green foliage of the plant, the habit of which is dwarf and compact. 9*s.* per doz.

SPIRÆA PALMATA.—The bright pink Spiræa, one of the most beautiful hardy plants in cultivation, producing lovely broad corymbs of pink flowers. It is a native of Japan. 9*s.* per dozen.

SPIRÆA PALMATA ALBA.—A counterpart of *S. palmata*, except in the colour of the flowers, which are pure white, a very beautiful and elegant variety. 12*s.* per dozen.



TIGRIDIA GRANDIFLORA ALBA.
